

BADR NOUKH

F U L L - S T A C K D E V E L O P E R

P R O F I L E

Jr Full Stack web Developer who loves writing clean code and shipping production ready applications. Proficient in Laravel, React and InertiaJS. During my internship at Terabyte Software, I built a complete hotel management dashboard from architecture through deployment and CI/CD. Worked closely with senior devs who pushed me to follow best practices and think like a production engineer.

W O R K E X P E R I E N C E

2025 (Aug - Nov)

Full-Stack Developer @Terabyte Software

- Developed and maintained a production-grade hotel reservation management dashboard, implementing core features including room management, user administration, payment processing, coupon system, and comprehensive audit logging for compliance.
- Collaborated with the development team to integrate Brevo email services and PayPal payment processing, ensuring secure transactions and reliable customer communication.
- Designed role-based access control (RBAC) architecture to enforce data security and granular user permissions across the platform.
- Led containerization efforts using Docker (Laravel Sail), standardizing development and deployment environments across the team.
- Implemented and maintained CI/CD pipeline for continuous feature deployment, including sandbox testing environments to support seamless user onboarding.

2023 - 2024

Independent Full-Stack Developer

- Developed a hotel booking management system (Guest-facing) using Laravel and React with Inertia.js for seamless backend-frontend integration.
- Integrated third-party payment services (PayPal).
- Designed and optimized database structures with proper indexing and relationships.
- Created responsive, accessible UIs with Tailwind CSS following modern design principles.
- Developed dynamic React applications with routing and state management.
- Built vanilla JavaScript projects with testing frameworks.
